Community Resources for Science Wish List

Books for Elementary Students

Our largest need, to support implementation of our Joyful Math & Science program, is for books that we can give to students and teachers! The books from the Amazon wish list all highlight diversity and cultural inclusion, to foster interest and nurture a sense of belonging while also highlighting exciting areas of science and possible future career pathways.

Materials for Class Science Investigations

Science materials bring the learning to life! The teachers in the Joyful Math & Science pilot program have developed lessons exploring scientific observation & sketching, light & shadow, water, energy, plant growth, and more. It takes a lot of seeds, batteries and colored pencils to bring science learning to life!

Volunteers:

Do you have expertise in Accounting, Sales, or Marketing? Corporate relationship building? Education? Fundraising? STEM Industry? We welcome volunteers interested in short-term projects, as well as those looking for longer term Board service to help further our mission.

Examples of past short-term pro-bono projects:

- Help design an outreach and messaging campaign to reach new corporate partners.
- Pro-bono independent financial review (CPA).
- Assist with assembling science material kits for distribution to classrooms.

To learn more about volunteering with CRS or to learn about serving on our Board of Directors, please contact Executive Director, Teresa Barnett, community@crs-science.org
